

This image is a notional representation of four incidents reportedly involving unidentified anomalous phenomena (UAP) in the western United States, as seen from above.

This illustration depicts multiple incidents reported by U.S. federal law enforcement special agents over a period of several days in October 2023.

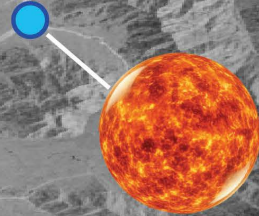

Incident 1: "Orbs Launching Orbs"

Agents reported observing multiple instances of an orange "mother orb" "launching" smaller red "orbs."

Incident 2: "Fiery Orb"

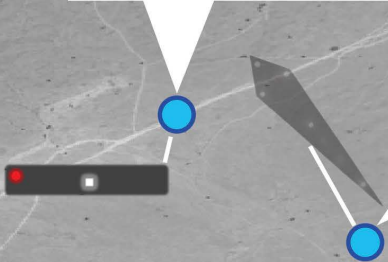

Agents reported observing a large "fiery orb" projected against a ridgeline at an approximate distance of 1,000 yards.

 : Observer position

Incident 3: "Dark Kite"

Agents reported observing a "thin or dark kite-shaped object" featuring one red light and one white light at a close estimated range.

Incident 4: "Translucent Kite"

Agents reported observing a "translucent kite-shaped object" at a close estimated range.

Note: All images were artificially generated using <https://genai.mil/>. Phenomena are enlarged for illustrative purposes and are not to relative scale. Distances are not to scale. All locations are notional, and do not accurately represent the relative position of the observers or reported phenomena.
