Title: █ Interview of █ █
Re: █ █ 10/█/2024

outside of █ back window. Initially, █ believed someone was in █ yard with a flashlight bobbing around. When █ went outside, █ observed a singular light that eventually split into two or three lights. This formed a triangular pattern with a light in the center and remained for approximately ten minutes. █ got █ to see what █ was seeing as well. █ while filming on █ smartphone, accidentally took a flash photo and the lights immediately disappeared.

█ Speaking to a sighting on 03/█/2022, █ played a video that was previously provided to the FBI and explained that the location of this sighting was not in the same location. █ stated that the UAP sightings that █ observes are typically at dusk or at night and the light observed appears to morph and move laterally.

█ █ first reached out to █ (█), formerly of █ through LinkedIn to speak about what █ had observed from █ home. In conversations with █ █ was told that what █ was observing was legitimate and that "people have been hurt by these things" and to be careful. █ asked █ if █ had a UFO experience before in █ life. At this point, █ explained an incident that occurred in 1996. █ stated that █ was driving with █ Army officer from Fort Bliss, TX to Fort Carson, CO. While in New Mexico, █ claimed that the vehicle █ was driving shut down and a large light shined on █ and █ passenger. After about two minutes the light went away and the vehicle's electronics turned back on.

█ █ has lived at █ current property, █ in █ since 2021 but █ previously lived about five miles from █ current home from █. █ stated that █ has seen hundreds of these lights from █ property and has numerous videos and photos that █ was willing to share. █ also stated that █ has seen these lights as well and others who have visited his property as well.

█ █ stated that █ has seen more activity since September. The sightings have not always been as long as █ initial sighting in 2021. There have been shorter bursts and it is common to have corrupted video when trying to record these sightings.

Title: [REDACTED] Interview of [REDACTED] [REDACTED]
Re: [REDACTED] 10/[REDACTED]/2024

[REDACTED] [REDACTED] explained how [REDACTED] used ADSB data to try a disprove what [REDACTED] was seeing as aircraft flying overhead. [REDACTED] explained that [REDACTED] cross referenced date and time stamps with ADSB records to determine what sightings may be aircraft. [REDACTED] would then determine the azimuth of the lights and check the ADSB data.

[REDACTED] [REDACTED] acknowledged throughout the interview that [REDACTED] never had an interest in UAPs and that a lot of what [REDACTED] said may seem weird or crazy.
