(see below).

# Range Fouler Debrief Form

Please complete this form to the best of your ability. If you do not have the requested information, please leave the field blank. If there was more than one "group," please report each on a separate form for data collection purposes. You should receive a response within 5 business days.

Last Name, First Name Rank Squadron SIPR Email Address Crew Position  
O-3 HSM-73 Pilot

This information is for contact only. SPEAR sanitizes all reports of identifying information. Absolutely no identifying information for aircrew or squadron will be recorded for analysis.

08/24/20 00:04:30 Night 705 168122 SSC No  
Date (mm/dd/yy) Time of detection Day / Night Side No. Buno Mission Description (CAS, BFM, etc) LFE?

21440 21440 1.4a Yes 310 5  
Contact Working Area Contact Latitude N/S Contact Longitude E/W Contact Altitude Altitude Wind Dir at Wind  
(Ex: W-72 1A) (DD:MM:SS) Contact Alt (From) Speed

Please attempt to determine a Lat / Long for the contact at initial detection. We recommend using JMPS to reference the sensor-derived bearing and range relative to the bullseye you had in use. If that method is not available, any reasonable derivation of location will work, but please be as specific as possible and make a note in the comments section. These locations may be used to cue other means of tracking.

Was the contact moving? Yes  
Direction/Speed (Ex. 090/15) 270/UNK

Arc Identifier Trackfiles Ambiguous

Please use the field below to describe the contact and any interaction in your own words with as much detail as possible. Please be sure to include any detail not included in questions above.

1.4a observed 3x possible unidentified small air contacts while conducting routine operations in the North Arabian Sea. Negative ES, radar track, and IFF track. Distance to contact was unknown. Speed of contact was unknown. Precise course of contact was unknown, but appeared to be on a westerly heading. No interaction took place between 1.4a and the unknown air contacts. Initially observed 1x unknown air contact and tracked it before losing sight as it went behind a cloud. When contact on the unknown air contact was regained, 2x additional unknown air contacts were seen due east of the location of the initial contact. All 3x unknown air contacts appeared to maintain their relative course, speed, and altitude.

Don't use the purple "submit" button! Save this form with filename "Date\_Squadron\_RF.pdf" and email it to (b)(6) (Also in the global). For troubleshooting, call (b)(6)

Thank you for your time. Please ensure all display tapes are ripped for the entire time of interaction and saved as a .wmv (Example: 4 May VFA-106 HUD.wmv). Squadron intel personnel shall upload those files to the repository located at this link.
